

4 WAYS MICROSOFT POWER AUTOMATE SOLVES 4 AUTOMATION CHALLENGES

KEY CHALLENGES WITH EXISTING RPA PLATFORMS

01

STRUGGLING WITH INNOVATION

The ability to incorporate new and emerging technologies like Cognitive (OCR & ICR), Machine Learning, & AI are limited and tied to Product Road-Maps, preventing a company's ability to innovate past a certain point.

02

ACCELERATING PRODUCTIVITY

Companies are struggling to cover all types of automations (attended/un-attended) and this coverage often requires costly manual work and or other 3rd party licensing.

03

REIGNING IN COSTS

Existing automation estates are expensive to operate & are often a combination of mixed product releases and outside ecosystem licensed products. This creates unnecessary confusion and higher overheads that negatively impact profit margins.

04

PLATFORM MIGRATIONS ARE EXPENSIVE

Migrating your automation estate between either platforms or product releases are costly, time-consuming and often prohibitive, hindering a company's automation ROI.

INTELLIGENT AUTOMATION WITH MICROSOFT

05

COMPETE AND GROW

With Power Automate you're able to streamline processes by enabling new tech like AI, Cognitive and ML to automate workflows across your technology and Application landscape.

06

SCALE ACROSS TEAMS

PAD's single platform ensures that everybody in an organization can automate using their favorite on-premises and cloud-based apps and services.

07

AUTOMATE FASTER & WITH MORE ROI

By combining AI, RPA, & process automation into a single cloud-based solution -Power Automate can generate enhanced automation ROI

08

PLATFORM MIGRATIONS BECOME POSSIBLE

With Blueprint's powerful migration capabilities we can get you on to PAD with 60-75% time and cost savings.
